Subsection 4.—The Forty Leading Manufacturing Industries.

There was a number of significant changes in the ranking of the ten leading industries in 1932, aside from the appreciable decreases in production, employment, etc. Tables 10, 11 and 12 which follow show the forty leading industries for 1932 ranked according to the gross value of products, the net value of products, and the salaries and wages paid, respectively.

The Forty Leading Industries in 1933.—The completion of part of the compilation of the Census of Manufactures for 1933 permits of the inclusion as Table 10A of the forty leading industries classified according to gross value of production for that year. In the following statement the ten leading industries for 1933 are compared as to their respective ranks in 1933, 1932 and 1931:—

THE TEN LEADING INDUSTRIES, 1933, COMPARED AS TO RANK FOR THE YEARS 1933, 1932 AND 1931.

Industry.	Rank in 1933.	Rank in 1932.	Rank in 1931.
Pulp and paper.....	1	1	1
Central electric stations.....	2	2	2
Non-ferrous metal smelting.....	3	6	4
Slaughtering and meat packing.....	4	3	3
Flour and feed mills.....	5	4	5
Butter and cheese.....	6	5	6
Petroleum products.....	7	7	8
Bread and other bakery products.....	8	9	12
Cotton yarn and cloth.....	9	16	22
Printing and publishing.....	10	8	11

The outstanding change has been in the cotton yarn and cloth industry which was in twenty-second place in 1931, sixteenth in 1932 and has taken ninth place in 1933, having displaced the railway rolling-stock industry which was in tenth place in 1931 but is now in twenty-fourth (see Table 10A).
