Subsection 2.—The Manufactures of Quebec, 1932.

The pulp and paper mills of Quebec, the most important manufacturing unit of the province, produced goods with a selling value at the factory of \$63,317,497 in 1932. This exceeded by nearly \$19,000,000 the gross value of products of central electric stations (\$44,720,404), the industry which ranks second in importance. This was followed by non-ferrous metal smelting and refining (\$35,141,813), tobacco, cigars and cigarettes (\$31,923,004), cotton yarn and cloth (\$26,974,004), women's factory clothing (\$23,193,839), boots and shoes (\$18,635,509), petroleum products (\$18,241,142), etc. A change took place in the ranking of some of the important industries of the province. The non-ferrous metal smelting and refining industry advanced from eighth place in 1930 to third place in 1932, while sawmills dropped from fifth to twenty-first place. Compared with 1931, the petroleum products industry advanced from fifteenth to eighth place, the silk industry also advanced from twenty-first to fourteenth place while railway rolling-stock dropped from sixth to fifteenth place.
