¹ Read headnote to this table on p. 484.

Subsection 5.—The Manufactures of British Columbia*, 1932.

British Columbia was, in 1932, the third most important manufacturing province in the Dominion, producing goods to a gross value of \$140,538,016. About 13 p.c. of this production, or \$17,729,397, is seen in Table 17 to be that of the sawmilling industry; the predominance of forest products industries in the industrial life of the province is still further emphasized if to this figure be added \$11,056,236, the value of products of the pulp and paper industry which ranks second. Third in importance among the industries of British Columbia is central electric stations, with a gross value of production of \$10,082,357. This was followed by fish curing and packing \$9,085,834, petroleum products \$7,182,495, slaughtering and meat packing \$6,001,923. Fish curing and packing, which usually ranks as the second industry, declined to fourth place in 1932.

^{*}Including the Yukon Territory.
