Movement of Canadian Wheat, Crop Year 1933-34.—A résumé of the Canadian wheat movement naturally begins with a description of the crop of the Western Inspection Division. The wheat crop of 1933 marketed in the Western Division during the crop year from Aug. 1, 1933, to July 31, 1934, amounted to 264.3 million bushels. A carry-over of 172.9 million bushels from the previous crop year, together with some minor items, brought the stock of the Western Division to a total for the year of 437.0 million bushels. As for distribution, 260.8 million bushels were commercially disposed of, the chief items of which were 75.3 million bushels exported to the United Kingdom and 101.5 million bushels shipped to the Eastern Division. The direct exports to the United States were only 117 thousand bushels and to other countries 20 million bushels. The total shipments from the Western Division were thus 215.4 million bushels. The wheat used by the milling companies for the manufacture of flour amounted to about 17.1 million bushels, of which 12.7 million bushels were ground into flour for domestic consumption. The all-rail movement eastward from the Western Division, including shipments to the Ogilvie Flour Mills Co. at Fort William for grindings, was 201 thousand bushels. Lake shipments from Fort William and Port Arthur were 145.9 million bushels,
