

Estimates of the numbers of telephone conversations during 1933 were 2,247,144,000 local and 24,437,452 long-distance calls. Systems operating almost 90 p.c. of all telephones in Canada made estimates by actual count on days of normal business, and, after adjusting for uncompleted calls, holidays, Sundays, etc., the average was multiplied by 365. The long-distance calls in practically all cases were the actual long-distance calls put through or completed. The averages were 1,885 local and 21 long-distance calls per telephone and 213 telephone conversations per capita as compared with 223 in 1932. The estimated per capita average for the United States in 1932 was 205 and for New Zealand, 206.

Statistics of the number of telephone companies reporting to the Dominion Bureau of Statistics are given in Tables 72 and 73.

71.—Summary Financial Statistics of Telephones in Canada, years ended June 30, 1911-18, and Dec. 31, 1919-33.
