Subsection 5.—Employment and Unemployment Statistics of the Census.

In the 1933 edition of the Year Book pp. 775-780 were devoted to an examination of the preliminary figures of unemployment as reported at June 1, 1931, for that date and for the preceding twelve months. The final results of this enquiry are available in Vol. 6 of the Census Publications, which may be obtained from the King's Printer, Ottawa, at a price of 75 cents for the paper-bound volume.

Tables 24 and 25, supplementing information given by provinces at pp. 775-780 of the 1933 Year Book, summarize by industries the statistics of those actually unemployed at the date of the Census, and of time lost during the twelve months preceding that date. It will be noted in Table 25 that the unemployment was most serious in forestry, fishing and trapping, in construction and in the unspecified group, including largely general labourers.
