

Teachers in Training.—Detailed information regarding male and female teachers in training in 1932-33 is given in the Bureau of Statistics' "Annual Survey of Education in Canada, 1933". A summary of the number of teachers in training in each year from 1902 to 1933 is furnished by provinces in Table 8.

8.—Provincially-Controlled Schools in Canada: Number of Teachers in Training in Normal Schools and Colleges, by Provinces, 1911-33.

Note.—In recent years several universities have added teacher-training departments, in most cases for university graduates who are trained for teaching positions in the secondary schools. These are included in the figures since 1930. The large increase in Quebec in 1932 is due to the recognition of teaching brothers' scholasticates as normal schools for the first time; that in Ontario in 1933 is due to a second year of training being inaugurated. For corresponding figures for 1902-10, see p. 976 of the 1933 Year Book.
