

the Department of Mines and of the Interior and the co-operation of both Departments is given to the Board in its investigations. Partly as a result of the investigations and recommendations of the Board and of the publicity given to its findings, diversified sources of fuel supply have been developed and fuel shortages are no longer experienced. The Board has been instrumental in enabling Canadian coal to find markets in territory previously supplied from foreign sources. At the present time the work of the Board covers continued investigation of the fuel situation in relation to Canada; the Board also administers the Domestic Fuel Act, and the Orders in Council providing assistance to the coal industry. The following reports and publications have been issued: Interim Report of the Dominion Fuel Board (1923); Central and District Heating—Possibilities of Application in Canada, by F. A. Combe (1924)<sup>1</sup>; Coke as a Household Fuel in Central Canada, by J. L.
