### 2.—Numbers of Immigrant Arrivals in Canada from the United Kingdom, the United States and other Countries, calendar or fiscal years ended 1881-1935.

Note.—The figures of immigration from the United States for the years 1904 to 1924, inclusive, differ from the figures published in issues of the Year Book prior to 1934-35, owing to the discovery that prior to April 1, 1924, certain persons returning to Canada from the United States after having previously resided in Canada had been improperly included in the immigration figures.

<sup>1</sup>The figures of immigration from the United States for the years 1881 to 1891 do not distinguish between immigrants and non-immigrants. As the U.S.-born population of Canada, according to the censuses, increased only from 77,753 to 80,915 between 1881 and 1891, it would appear that the number of permanent immigrants from the United States in these years must have been comparatively small. No statistics of immigrants from the U.S. were collected for the years 1892 to 1896. <sup>2</sup>Nine months ended Mar. 31. <sup>3</sup>Calendar year. <sup>4</sup>Six months, January to June, inclusive.
