¹ Nine months.

Official returns indicate that the movement of population between the two countries is now definitely toward Canada. According to the official returns of the United States Government, immigration to that country from Canada in the twelve months ended June 30, 1934, amounted to 5,751, while United States citizens returning from Canada to take up permanent residence in their own country amounted to another 5,976, a total outward movement of 11,727. In the same period the movement of immigrants from the United States to Canada amounted to 6,823 and that of returning Canadians to 7,534, a total inward movement of 14,357, or a net gain to Canada of 2,630 persons.

In the past four years there has also been considerable emigration from Canada to the British Isles. Table 19, taken from the *Statistical Abstract of the United Kingdom*, shows the movement of population between the United Kingdom and British North America from 1924 to 1934. Inasmuch as the movement between the British Isles and Newfoundland is negligible, the table may be taken as presenting a fair picture of immigrant and emigrant movement between Canada and the United Kingdom.

In Table 20 will be found the number of transoceanic passengers entering Canada during the calendar years 1933 and 1934, by description and classes, with totals by classes for the years 1930 to 1932. Figures covering the fiscal years 1926 to 1934, will be found on p. 228 of the 1934-35 Year Book.
