

up 41.1 p.c. of total production, manufactures 33.4 p.c., mining 9.1 p.c., and electric power 6.3 p.c. In *Saskatchewan* agriculture contributed 75.9 p.c., manufactures 9.9 p.c. and electric power 4.1 p.c. In *Alberta*, agriculture yielded 64.6 p.c. of the total, mining 13.5 p.c., manufactures 12.3 p.c. and electric power 3.1 p.c.

British Columbia.—The net production from manufacturing in British Columbia during 1933 was \$75,200,000, or 47.3 p.c. of all net production, but nearly half of this amount was derived from manufacturing processes closely associated with the primary industries, especially logging and fishing. Manufactures, eliminating this duplication, comprised 25.1 p.c. of the net output of the province. Mining was next in importance with 19.4 p.c., while forestry with 18.6 p.c., agriculture with 16.0 p.c., and fisheries with 7.6 p.c. followed in the order named.

Details showing the gross and net values of production, by industries, in the various provinces in 1933, together with percentages, are given in Tables 4 and 5.

4.—Gross and Net Values of Production in Canada, by Industries and Provinces, 1933.

NOTE.—For Dominion totals, see Tables 1 and 2.
