

accounted for an increase of 8.7 p.c. in total values. The improvement in 1934, following upon the smaller increase of 1933, brought total values back considerably above those of 1931, although they still remained 38.2 p.c. below the \$55,050,973 recorded in 1928, before the decline began. The decline in the values of 1934, compared with those of 1928, due to lower prices was 21.4 p.c. and due to smaller catch 16.8 p.c.

5.—Yields of the Fisheries of Canada, Compared as to Quantity and Value, for 1933 and 1934. ("000" omitted.)

Kind of Fish or Product.	Actual Value, 1934.	Value at Prices of 1933.	Actual Value, 1933.	Increase (+) or Decrease (-)	Due to Higher (+) or Lower (-) Prices.	Due to Larger (+) or Smaller (-) Quantities.
