

13.—Quantities and Values of Silver Produced in Canada, by Provinces, calendar years 1911-35.

NOTE.—For the years 1887 to 1910, see Canada Year Book, 1916-17, p. 271. Nova Scotia, Saskatchewan and Alberta have also shown a small production in recent years, production during 1934 being shown in Table 5 of this chapter, p. 348.

¹ Preliminary figures.

World Production of Silver.—The world production of silver was estimated by the Director of the United States Mint, as shown in Table 11 of this chapter, at 190,859,421 fine oz. for 1934, an increase of 13 p.c. from 1933 but a decrease of 27 p.c. from 1929, when world production reached a record maximum of 260,970,029 fine oz. The silver production of Canada in 1934 was 16,415,282 fine oz., or about 8.6* p.c. of the estimated world total for that year. This placed Canada third, next to Mexico and the United States.

* This percentage, based on the world estimate of the Director of the United States Mint, differs slightly from that on p. 341 based on the world estimate of the Imperial Institute.
