

**Canadian Preference on Imports from Empire Countries.**—As indicated in the paragraph above dealing with trade with Empire countries, a declining trend in the imports from Empire countries down to 1897 was changed after the British Preferential Tariff of 1897 to a rising trend. Imports from the United Kingdom since 1868 are shown in Table 6. Table 8 shows the average *ad valorem* rates of duty collected on imports from the United Kingdom, the United States and all countries. This shows an appreciable drop in the rates of duty on imports from the United Kingdom after 1897. However, even after this, average rates of duty are shown in many years to be higher on both dutiable imports and total imports from the United Kingdom than from the United States in spite of the British Preference being in effect. A number of factors explain this situation. Dutiable imports from the United Kingdom consist very largely of highly manufactured goods normally subject to high rates of duty, whereas dutiable imports from the United States include a large proportion of semi-manufactured goods for further processing in Canadian factories and such goods carry a reasonably low rate of duty. The United States is also the chief source of Canadian imports of raw materials free of duty. Furthermore, alcoholic beverages and manufactured tobaccos which are subject to very high duties are an important element of imports from the United Kingdom but are insignificant in imports from the United States. Finally, especially in recent years, there is a large range of imports which are free of duty under the British Preference but are subject to moderate duties when coming from the United States. The values of such imports from Empire countries in the latest fiscal year are shown in Table 18. Imports from the United Kingdom which are free only under the preference tariff have increased from 0.6 p.c. in 1925 to 36.9 p.c. in 1935 of our total imports from that country. To make a fair comparison between the United Kingdom and the United States of the average rates of duty collected on ordinary dutiable imports, imports of alcoholic beverages and manufactured tobaccos should be eliminated, while imports free of duty under the British Preference but dutiable when imported from the United States should be added to the dutiable imports from the United Kingdom. This is done in Statement IV which follows.

**IV. COMPARISON OF THE AVERAGE AD VALOREM RATES OF DUTY ON DUTIABLE IMPORTS FROM THE UNITED KINGDOM AND THE UNITED STATES WITH DUTIABLE IMPORTS OF ALCOHOLIC BEVERAGES AND TOBACCO ELIMINATED AND IMPORTS FREE OF DUTY UNDER THE BRITISH PREFERENCE ADDED TO DUTIABLE IMPORTS FROM THE UNITED KINGDOM, FISCAL YEARS 1922-35.**

**NOTE.**—Figures in this statement do not include dumping and other special duties.

Fiscal Year.	United Kingdom.				United States.		Average Ad Valorem Rate on Dutiable Imports.	
	Dutiable Imports less Beverages and Tobacco.	Imports Free under British Preference.	Total Adjusted Imports.	Duty Collected.	Dutiable Imports less Beverages and Tobacco.	Duty Collected.	U.K.	U.S.
