1934.....	1,590,817	410,126	2,000,943	22,354

Section 8.—Strikes and Lockouts.

Statistics of strikes and lockouts in Canada have been collected by the Dominion Department of Labour since its establishment in 1900. Table 16 shows the numbers of disputes, of employees involved in disputes, and the time loss in working days for each year from 1921 to 1935 and the totals for the period beginning 1901. The items in the columns headed "time loss in man-working days" in the tables following are calculated by multiplying the number of persons directly involved in strikes and lockouts by the number of working days they are so affected during the time the disputes are in existence. Tables 17 and 18 give detailed analyses, by provinces and by industries, for 1934 and 1935.

Summary tables of the figures with details as to strikes and lockouts during 1935 will be found in the *Labour Gazette* for February, 1936, pp. 111-131.

Industrial Disputes in Recent Years.—From 1930 to 1935 the figures as to numbers of strikes and lockouts, numbers of employees involved and time loss were substantially greater than during the period 1926 to 1930, but were still much lower than during the years prior to 1926 when coal-mining strikes involved large numbers of employees and resulted in great time loss. In the latest five years most of the important disputes have been in clothing manufacturing, logging, saw-milling and woodworking industries, with a substantial number in coal mining. In 1935 there was an important dispute at Vancouver, B.C., involving longshoremen, and a sympathetic strike of longshoremen and other water transportation workers in the other Pacific ports. The figures for 1935, however, were much lower than for 1934. The number of disputes in 1935 was 120 as compared with 191 in 1934, while the number of workers involved was 33,269 as compared with 45,800 in 1934 the time loss being 288,703 man-working days as compared with 574,519 in 1934. Table 16 includes figures regarding coal mining, industries other than coal mining and all industries.
