

At pp. 1060-1063 of the 1934-35 Year Book, financial statistics of individual universities and colleges, classifying assets, receipts and expenditures in some detail were given. In some respects these statistics were incomplete and a thorough reorganization of the data has been undertaken. It is expected that a presentation of them, on the improved basis, in the 1937 Year Book will be possible.

Section 2.—Scientific and Industrial Research in Canada.

This section has, in past years, dealt with the history of scientific and industrial research in Canada and has included subsections outlining the organization and work of the National Research Council and of those provincial councils and private institutions which are primarily interested in research work. During the past year, the operations of these organizations continued to be conducted along the lines described in previous issues of the Year Book, and to conserve space the section is not reprinted in this edition. The reader is referred in this connection to pp. 866 to 872 of the 1932 Year Book.

Section 3.—The Libraries of Canada.

The Dominion Bureau of Statistics takes a biennial survey of libraries in Canada, the latest complete survey being for 1933. Under this heading, at pp. 1064-1065 of the 1934-35 Year Book, statistics of the 1933 Survey were given. Figures for the 1935 Survey will not be available until June or July, 1936.

Section 4.—Art in Canada.

An article entitled "The Development of the Fine Arts in Canada", contributed by Newton MacTavish, M.A., D. Litt., appeared at pp. 995-1009 of the 1931 Year Book and a shorter article, dealing more particularly with the National Art Gallery, at pp. 886-888 of the 1924 Year Book.
