¹ Includes 4 annexes to general hospitals.² Includes 3 annexes to general hospitals.

Subsection 1.—Statistics of Hospitals, other than Mental.

The total number of various general hospitals in operation in Canada during 1934 is given in the first part of Table 1. It is seen from that table that in addition to 628 public general hospitals there were 257 private general hospitals and 32 hospitals operated by the Dominion Government were made up of: 8 for war veterans, 1 quarantine and immigration, 1 marine and 2 leper hospitals under the direction of the Department of Pensions and National Health; 9 military hospitals under the Department of National Defence; and 7 hospitals for Indians under the Department of Indian Affairs.*

Summary statistics of reporting hospitals, which included 98.6 p.c. of all hospitals in 1934, are presented for the years 1931 to 1934 in Table 2, and detailed statistics of staff, facilities and movement of patients are shown by provinces in Table 3. It will be observed that the majority of hospitals not reporting are general hospitals in Yukon. These were naturally small hospitals and the non-inclusion of their statistics does not materially affect the value of the figures given for Canada and the provinces.

* A complete list of all hospitals in Canada, giving name, location, type, bed accommodation, etc., will be found in the new Hospital Directory for Canada, 1934, issued by the Dominion Bureau of Statistics.
