

# GEOLOGY OF CANADA

LEGEND	
GEOLOGICAL AGE	DESCRIPTION
Tertiary	Sedimentary Volcanic
Mesozoic	Intrusives (Chiefly Granitic Rocks)
	Cretaceous & Jurassic (Sedimentary & Volcanic)
	Triassic (Sedimentary & Volcanic)
	Intrusives (Mostly Devonian)
Palaeozoic	Permian
	Carboniferous
	Devonian
	Silurian
	Ordovician
	Cambrian
	Precambrian
Acid Intrusives (Granite, etc.)	
Late Precambrian or Early Cambrian	
Late Precambrian (Animikie & Keweenaw)	
Early Precambrian Sedimentary & Volcanic Formations (Coele, Bruce, Granville, Keweenaw, etc.)	
Unclassified (Chiefly Palaeozoic)	

CHARACTERISTIC LIFE	TYPICAL DIAGRAMMATIC SECTION OF THE EARTH'S CRUST	CHARACTERISTIC ROCKS
AGE OF MAN		drift, sand, and gravel
AGE OF MAMMALS AND MODERN PLANTS	Quaternary	drift, sand, and gravel
	Tertiary	shale and sandstone
AGE OF REPTILES	Cretaceous	shale and sandstone
	Jurassic	sandstone
	Triassic	shale and sandstone sandstone shale and sandstone sandstone
AGE OF AMPHIBIANS AND LYCOPODS (MOSS-LIKE TREES)	Carboniferous	shale and sandstone shale and sandstone sandstone
	Devonian	shale and sandstone sandstone sandstone sandstone
AGE OF FISHES	Silurian	shale and sandstone
	Ordovician	shale sandstone shale sandstone sandstone
AGE OF HIGHER (TRU) INVERTEBRATES	Cambrian	shale and sandstone sandstone sandstone
	Precambrian	acidulous rocks granite
