## Section 1.—Census Statistics of General Population.

Since the creation of the Dominion of Canada, in 1867, decennial censuses have been taken on the de jure plan as of the dates April 2, 1871, April 4, 1881, April 5, 1891, April 1, 1901, June 1, 1911, 1921, and 1931. The population of Canada and its percentage distribution as on each date, together with the absolute and percentage increases from decade to decade, are given in Tables 1 to 4 immediately following. The population is given by counties or census divisions on pp. 103-107 of the 1934-35 Year Book and corresponding areas and densities of population for 1931 on pp. 109-110 of the same edition.

The population of the Prairie Provinces in 1906, 1916 and 1926 is shown on pp. 127-128 of the 1930 Year Book. For inter-censal estimated populations, see table on p. 153.

\*Corrected as a result of the Extension of Boundaries Act, 1912.

\*Corrected by transfer of population of Fort Smith (368) to Northwest Territories.

The decreases shown in the population of the Northwest Territories since 1891 are due to the separation therefrom of vast areas to form Alberta, Saskatchewan and Yukon and to extend the boundaries of Quebec, Untario and Manitoba.

\*Revised in accordance with the Labrador Award of the Privy Council, Mar. 1, 1927.

\*Members of the Royal Canadian Navy were counted in their homes in the Census of 1931.
