1936.....	3,370,100	19,195,000	14	2,783,000

Egg Production.—Table 19 gives the estimated numbers of egg-producing hens, quantities of eggs produced, prices and values, by provinces, for the years 1934 to 1936 inclusive. The data for egg-laying hens were calculated from the numbers of mature birds shown in the June surveys, with reductions to allow for cocks and cockerels. The production of eggs per hen and the average prices shown in the table were made with the assistance and advice of extension workers and poultrymen connected with the provincial Departments of Agriculture.

19.—Annual Production and Value of Farm Eggs in Canada, by Provinces, 1934-36.

Province.	Year.	Number of Laying Hens.	Production of Eggs per Hen.	Number of Eggs Produced.	Price Per Dozen.	Value.
