The Nursery Industry.—The first commercial nursery in Canada was established near Fonthill, Ontario, and this district still continues to be one of the leading centres of the industry. While the province of Ontario accounts for the major part of the nursery stock output, there are nurseries distributed through all the provinces and the wholesale value of the product sold during the year ended May 31, 1936, was \$795,000, of which fruit stock accounted for \$369,693.
