

Figures of the exports of wood-pulp from Canada in the fiscal years ended Mar. 31, 1933-36, will be found in Table 12 of the chapter on External Trade. In the calendar year 1936 the exports of wood-pulp from Canada were 754,496 tons.

The total exports of the eleven principal pulp-exporting countries of the world in 1935 were 6,737,916 short tons, of which Canada contributed about 10 p.c.

8.—Exports of Wood-Pulp from Principal Wood-Pulp Producing Countries of the World, calendar years 1913, 1934 and 1935.

Paper Production.—The paper-making stage of the industry involves the consumption of wood-pulp and other paper stock in the manufacture of paper and other pulp products. Accurate annual statistics for this part of the industry are available only for the years 1917 to 1935 inclusive. These are given in Table 9.

During 1935 there were 43 combined pulp- and paper-mills and 24 mills making paper only. These 67 establishments produced 3,280,896 tons of paper, together with certain miscellaneous pulp products, with a total value of \$129,078,386, as compared to 3,069,516 tons, valued at \$120,892,225 in 1934. Newsprint paper now forms nearly 85 p.c. of the annual paper production in Canada. In 1935, the production was 2,765,444 tons, valued at \$91,762,201, a record production for volume although its value was lower than that of 1929, the previous record year. The preliminary estimate for 1936 is 3,190,599 tons, also a record for volume.
