Natural Gas and Petroleum.

Natural Gas.—The production of natural gas increased in value from \$1,346,471 in 1910 to \$10,289,985 in 1930, but declined to a value of \$8,712,234 in 1933 and \$9,363,141 in 1935. The producing wells in the east are in southwestern Ontario, and near Moncton, N.B. The principal producing fields in Alberta are the Turner Valley (about 35 miles southwest of Calgary), Medicine Hat, Viking (about 80 miles southeast of Edmonton), Redcliff, Foremost, Bow Island, and Wetaskiwin. Wainwright is supplied with gas from the Maple Leaf well in the Fabyan field. Near Lloydminster, in Saskatchewan, a well was brought into production during 1934 and is now supplying that town with gas. In 1935 Ontario was credited with about 53 p.c. of the total value but only 33 p.c. of the total quantity, while Alberta produced 44 p.c. by value and 64 p.c. of the total quantity. The production by provinces since 1920 is given in Table 27.

27.—Quantities and Values of Natural Gas Produced in Canada, by Provinces, calendar years 1920-36.

Note-For the years 1892 to 1919, see "Mineral Production of Canada", 1928, p. 188.
