<sup>1</sup> See headnote to this table on p. 446.

<sup>2</sup> Net value is obtained by deducting cost of materials, fuel and electricity from the gross value. These calculations are not available for the individual provinces.

**Subsection 5.—The Manufactures of British Columbia,\* 1934.**

British Columbia was, in 1934, the third most important manufacturing province in the Dominion, producing goods with a gross value of \$176,721,398. About 17 p.c. of this production, or \$29,404,759, is seen in Table 16 to be that of the sawmilling industry; the predominance of forest products industries in the industrial life of the province is still further emphasized if to this figure be added \$13,278,736, the value of production of the pulp and paper industry which ranks third. Second in importance among the industries of the province is that of fish curing and packing, with a gross value of production of \$15,078,813. This was followed by central electric stations with \$10,715,293, petroleum products \$8,249,971, slaughtering and meat packing, \$7,521,042, etc.

\* Including the Yukon Territory.
