Table 3 classifies the various types of construction carried out in 1935. The item "trade construction" covers such items as brick laying, carpentry, plumbing, heating, electrical work, etc., reported by contractors who confine themselves to a specific type of work. Details by provinces, and more complete information on the industry than it is possible to include in the limited space available in the Year Book, will be found in the Bureau's report on the construction industry for 1935.
