¹ Excludes electric lines.

² Revised since the publication of the 1936 Year Book.

Commodities Hauled.—In Table 21, the duplications from two or more railways handling the same freight have been eliminated. The peak year was 1928 when agricultural products were particularly heavy. The 1935 statistics show an increase of 1,104,595 tons, or 1.6 p.c. over the 1934 total and a decrease of 41.7 p.c. from 1928.

21.—Commodities Hauled as Freight on Steam Railways during the calendar years 1931-35.

NOTE.—In this table duplications are eliminated, i.e., the same freight handled by two or more railways is counted only once. In this respect these figures differ from those in the corresponding table in the 1926 and previous Year Books.
