

In accordance with an agreement of the Conference of British Commonwealth Statisticians, which met in Ottawa in 1935, an effort was made to collect statistics regarding urban streets and roadways in 1935. The resulting statistics appear in an appendix to the report on The Highway and Motor Vehicle in Canada, 1935, issued by the Bureau of Statistics. As these first results are considered preliminary, they are not included in the table. The total was \$10,773,000, of which \$2,691,000 was new construction and major improvements.
