<sup>1</sup> Figures for 1911-18 are for years ended June 30; those since 1918 are for calendar years. <sup>2</sup> Includes telephones on rural exchange lines and urban exchange lines which have more than four parties and which run out into adjacent rural areas. <sup>3</sup> Revised since the publication of the 1936 Year Book.

The density of telephones in the different provinces is naturally influenced by the urbanization of the population because the number of telephones used for business purposes is much greater in cities and towns than in rural areas.
