**Subsection 3.—Higher Education.**

The tables of this subsection are intended to include all institutions in the Dominion offering instruction in courses that are the equivalent of at least two years in advance of matriculation. In the table on enrolment the name of each institution is given in the language (French or English) used therein as the main language of instruction. Table 10 gives a summary of the degrees and diplomas granted by the different universities and colleges of Canada, and Table 11 shows the full-time students attending the faculties and courses of instruction offered in each institution. In addition a considerable number of part-time students attended university courses.

**Students of University Grade.**—The aggregate number of students in attendance was reported as 93,213. Of these 40,959 were of university grade (*i.e.*, following courses for which matriculation was prerequisite) and 34,446 were in attendance at the regular sessions. They were enrolled in about 160 different colleges or universities. Of those attending the full sessions 32,798 were undergraduates, while 1,648 were graduate students, *i.e.*, working toward a higher degree in a subject in which they already held a bachelor degree. Many of the large numbers classed as undergraduates actually held degrees, but not in the subject or faculty in which they were studying during the session under consideration.
