¹ Less than one-tenth of one per cent. ² Includes the Ukraine. ³ This figure gives the number of children whose fathers and mothers were born in the same country. The difference between this figure and the total number of births represents the number of children whose fathers and mothers were born in different countries. ⁴ This excludes the percentage of "mixed parentage", i.e., where the two parents were not born in the same country.

Origins of Parents.—Table 7 gives the numbers and percentages of births during 1935 and 1936, distributed by the principal origins.
