

DEATH RATES PER 100,000 POPULATION IN CANADA

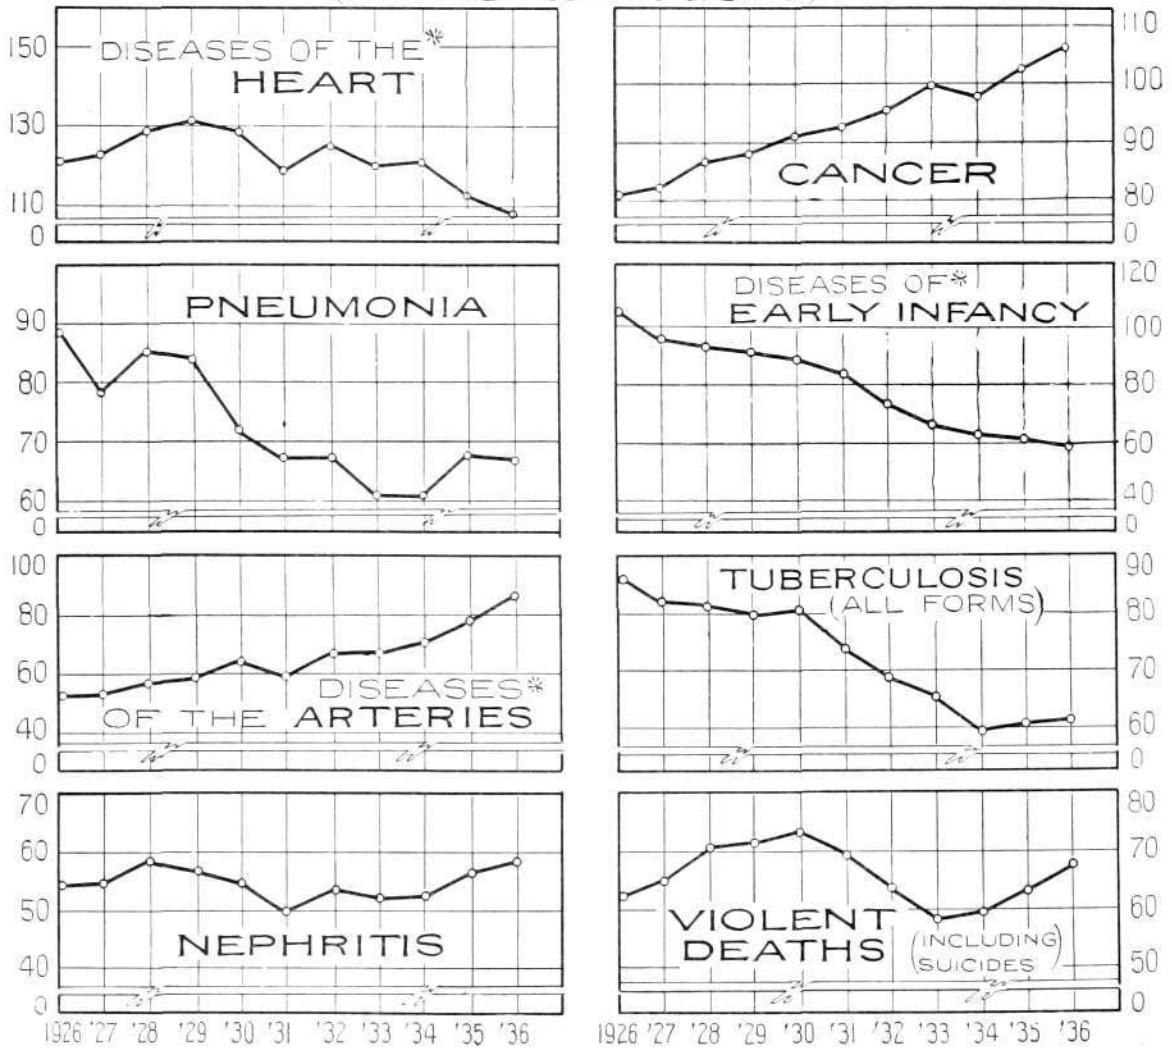

1926-1936

(EXCLUSIVE OF THE NORTHWEST TERRITORIES AND YUKON)

EIGHT IMPORTANT CAUSES OF DEATH

(RATES PER 100,000)

*The rubrics (of the International List) included in the indicated groups have been selected to preserve the greatest degree of continuity possible. For this purpose it has been necessary to depart in these cases (indicated by the asterisks) from the groupings in Tables 19 and 20. In all other cases the classification is the same as shown in the tables.
