**Average Values of Farm Lands.**—Statistics showing the average values of farm lands in Canada in 1910 and from 1919 to 1937, are given in Table 40. The values are as estimated by crop correspondents and show the rise in land values between 1910 and 1920, the general decline with moderate fluctuations from 1920 to 1929, and the rapid fall since 1929 to a point below the 1910 level for the country as a whole.

<sup>1</sup> Orchards and fruit lands, 1937, with 1936 in parentheses: Nova Scotia \$96 (\$94); Ontario \$89 (\$88); British Columbia \$261 (\$266). <sup>2</sup> Actual returns were not collected from crop correspondents in Saskatchewan for 1924, and the estimate of 1924 is interpolated.

Subsection 11.—International Agricultural Statistics.

**World Production of Cereals and Potatoes.**—Table 41, constructed from data published by the International Institute of Agriculture, shows the areas and yields of wheat, oats, barley, rye, corn, and potatoes for the years 1936 and 1937 in countries of the Northern Hemisphere, and for the years 1936-37 and 1937-38 in countries of the Southern Hemisphere. The annual average acreages and yields are also given for the five-year period, 1931-35 (1931-32 to 1935-36), and the areas and yields of 1937 (1937-38) are compared in percentages with those of the five-year period.
