¹ Information not available prior to April 1, 1936.

² Nine months, April to December, 1936.

Sharp increase in the value of fisheries exports, as compared with 1936 value, took place during 1937. Shipments of fish and fish products to export markets during the year had a value, in round figures, of \$28,834,000, or almost \$3,500,000 more than in the preceding year. So far as fisheries production in 1937 is concerned, preliminary figures indicate some decrease in the landings of sea fish and shell fish, but an increase in the landed value of the sea catches to the fishermen. Statistics of fresh-water catch and landed value are not available at the time of writing.
