¹Included with cattle.

The interprovincial and export movement of live stock in 1936 showed increases in all classes. Total shipments in 1936 with comparative figures for 1935 in parentheses were as follows: cattle 756,512 (584,642); calves 255,991 (191,128); swine 900,185 (891,266); and sheep 262,013 (249,451).

The marketings of live stock through stockyards, by direct shipment to packers, or by export according to provinces of origin for the calendar year 1936 are given in Table 13. In Table 14 are given the statistics of the grading of animals from several provinces marketed through the stockyards in 1936 and, in the case of hogs, those marketed direct to packers, since a majority of these animals are handled in this way. Of recent years the practice is developing of grading an increasing proportion of hogs by the carcass after being dressed at the packing plant. Hogs graded by each method are shown separately in Table 14.
