Statistics of National Debt.—Summary statistics of the national debt of Canada as at Confederation, and at the end of each fiscal year thereafter down to 1937, are given in Table 18, while details of the active assets and of the gross liabilities, which formerly followed here as Tables 19 and 20, are now given as at the end of each of the past five fiscal years in Table 1, pp. 839-840. Further details of the funded debt, showing the various issues of bonds, the annual interest charges and the place at which principal and interest are payable, are given as at Mar. 31, 1937, in Table 19. From this it appears that the total payable in London at that date was \$409,867,597, in New York \$449,000,000, and in Canada \$2,478,491,235. Thus three-quarters of the funded debt of the Dominion was payable within the Dominion itself, and the interest payable outside of Canada was a comparatively small item.
