

and that of the cod fishery, \$293,000,000. These facts have affected the relative standing of the provinces, British Columbia now occupying the leadership that in earlier times belonged to Nova Scotia. The record of production since 1870, production by provinces for the past six years, and the record of principal fish products for the past five years, are shown in Tables 2, 3, and 4, respectively.

In Table 4 the quantities given are those of primary products caught, but the values are those of all products, primary and secondary, marketed. The grand totals are also subdivided so as to show the values that the sea fisheries and inland fisheries, respectively, yield, as compared with the whole. More detailed tables of quantities and values of both sea and inland fish marketed, such as those published on pp. 326-328 of the 1938 Year Book, may be found at pp. 17 to 23 of the Report on Fisheries Statistics, 1937, published by the Dominion Bureau of Statistics.

4.—Quantities Caught and Values of All Products Marketed of the Chief Commercial Fishes of Canada, 1933 to 1937.
