¹ Ling cod was included with cod in 1926. ² Landings at British Columbia ports by United States vessels excluded in 1934 and later years. ³ Clams only in 1935 and later years. ⁴ Totals include minor items not specified. ⁵ First reported in 1927 and in that year the value was too small to be represented as a percentage. For volume index, 1927=100. ⁶ See footnote 1. The average of the years 1927-30 was taken as the quantity of ling cod for 1928 and this was deducted from the quantity of cod reported for 1928.
