¹ From 1911 to 1931, inclusive, values calculated on basis of fine oz.—\$20-671834; since then, at world prices in Canadian funds. ² First reported production in this province. ³ Includes value of production of the Northwest Territories amounting to \$7,028 in 1935; \$35 in 1936; and \$140,444 in 1938. ⁴ Preliminary figures.

World Production.—A sketch of the development of the gold-mining industry of the world since the discovery of America may refer to four successive periods. During the first period extending from 1493 to 1760, the annual production averaged nearly 337,000 fine oz. The placer mining of Brazil and Colombia swelled the average output of the last 60 years of the period to about 606,000 fine oz. per year.
