¹ Exclusive of minor quantities of Canadian corn, buckwheat, mixed grain, and soya beans.

Flour Milling in 1937.—The flour- and feed-milling industry in Canada in 1937 showed a decrease of 32 mills of all classes from 1936, and capacity of flour mills was increased by 15 barrels of flour a day from the 1936 figure. Capital investment was \$56,280,032. The mills were distributed by provinces as shown in the statement appearing in the Manufactures Chapter at p. 391. Statistics of the employees, value of products, etc., for both flour and feed mills, for the latest year available, will be found in Table 9 of the chapter on Manufactures, pp. 377-442 of this volume.
