

20-24, and steadily increased for each quinquennial age group until it was 11·3 years for the bridegrooms 50 years or over in 1937. On the other hand, when the parties are grouped by the age of the bride, the same regularity is not shown. In the case of brides in the age groups 25-29 years and 30-34 years, the bridegrooms approximate most closely in age to their brides. Since these tables are based upon all marriages contracted during the year, the figures given should not be understood to signify the average ages at *first* marriage. Out of each 1,000 bridegrooms in 1938, 942 were bachelors, 48 widowers, 10 divorced men; out of each 1,000 brides, 960 were spinsters, 31 widows, 9 divorced women. The first year in which as many as 1 p.c. of those marrying had previously been divorced was 1928. The comparison between the figures of divorces granted, as shown in Table 15 of this chapter, and the number of divorced persons re-married is of some interest. Thus 1,870 divorces were granted in 1938, while 887 divorced males and 789 divorced females married again. This, of course, does not mean that these were the same persons. Table 12 gives the average ages of brides and grooms by provinces.

**Nativity of Brides and Bridegrooms.**—The majority of marriages contracted in the western provinces in past years were between persons born outside Canada. This condition, however, is being quickly changed and such percentages in all the western provinces show a general reduction over the past few years. (See Table 13.) Both Canadian-born brides and bridegrooms are now in the majority in each province and in the Maritime Provinces and Quebec they show a marked predominance. Taking Canada as a whole, over 83 p.c. of all grooms and over 89 p.c. of all brides in 1938 were born in Canada; these are the highest percentages shown for the period covered by the statistics
