¹ Revised since the publication of the 1939 Year Book. In conformance with Resolution 23 adopted by the Conference of British Commonwealth Statisticians of 1935, the cost of fuel and purchased electricity was deducted from the gross value of all industries for 1936 and 1937. This is in addition to the deduction for cost of materials and process supplies.

² Comprises mineral production, as shown in Chapter XII, Table 1, plus the value of ores and other raw materials of the smelting industry. ³ Includes dairy factories, sawmills, pulp and paper mills, fishcanning and curing, and certain mineral industries, which are also included in other headings above. This duplication, amounting in 1936 to a gross of \$658,618,641 and a net of \$248,214,552 and in 1937 to a gross of \$830,881,358 and a net of \$313,225,585, is eliminated from the grand total.

⁴ Includes duplication mentioned in footnote ³. The percentage of the net manufactures *n.e.s.*, to the total net production in 1937 was 40.17.
