¹ Revised since the publication of the 1939 Year Book.

Acreages and Values, 1934-39.—In the latest year the acreages under field crops increased by slightly over 2 p.c. and the value of the crops increased by 16.9 p.c., as indicated by the figures of Table 7.

The statistics of the principal field crops, shown in Table 8, have been augmented in this edition of the Year Book by the addition of a five-year average covering the years 1933-37. For the Dominion as a whole, peas and grain hay are the only crops showing a production under the average.

7.—Acreages and Values of Field Crops in Canada, by Provinces, 1934-39.

NOTE.—For earlier figures, see Statistical Summary at the beginning of this volume.
