Coal Consumption.—The sources of coal consumed in Canada in the calendar years 1920-38 are shown in Table 28, detailed figures of coal *made available for consumption* during 1938 are given in Table 29; the difference between the totals of the two tables in the same year is accounted for by the fact that coal received may be held in bond at Canadian ports and not "cleared for consumption" until required, while coal received in previous years may be taken out of bond (cleared for consumption) in a later year. Normally, the coal made available for consumption is greater than the apparent domestic consumption, since coal is landed at Canadian ports and re-exported or ex-warehoused for ships' stores without being taken out of bond, but while remaining in bond at the port it is available for domestic consumption if required.

28.—Consumption of Canadian and Imported Coal in Canada, by Quantities and Percentages, 1920-38.

NOTE.—Figures for the years 1866 to 1910, inclusive, will be found at p. 354 of the 1921 Year Book, and for the years 1911 to 1919 at p. 350 of the 1939 edition.

¹ The sum of Canadian coal mines' sales, colliery consumption, coal supplied to employees, and coal used in making coke, etc., less the tonnage of coal exported. ² Includes small tonnages from countries other than the United Kingdom and the United States. Deductions have been made from this column to take account of foreign coal re-exported from Canada and bituminous coal ex-warehoused for ships' stores.

³ Figures based on estimates of population given on p. 103. ⁴ Revised since the publication of the 1939 Year Book.
