NATURAL GAS AND PETROLEUM.

Natural Gas.—The producing wells in Eastern Canada are in southwestern Ontario, and near Moncton, N.B. The principal producing fields in Alberta are the Turner Valley (about 35 miles southwest of Calgary), Medicine Hat, Viking (about 80 miles southeast of Edmonton), Redcliff, Foremost, Bow Island, and Wetaskiwin. Wainwright is supplied with gas from the Maple Leaf well in the Fabyan field. Near Lloydminster, in Saskatchewan, a well was brought into production during 1934 and is now supplying that town with gas. In 1939, Ontario was credited with over 57 p.c. of the total value but less than 34 p.c. of the total quantity, while Alberta produced 40 p.c. by value and over 63 p.c. of the total quantity.

31.—Quantities and Values of Natural Gas Produced in Canada, by Provinces, 1920-39.

Note.—For the years 1892 to 1919, see "Mineral Production of Canada", 1928, p. 188.
