

group, where the latter province accounts for 16.0 p.c. of the gross production compared with 39.0 p.c. for Ontario and 32.1 p.c. for Quebec; in each of the other groups the positions of Ontario and Quebec lead by a wide margin.

Table 2 analyses the principal statistics of manufacturing in each province, by size of establishment. The picture here given reflects, in outline, the same general conclusion as Table 1. British Columbia, the third manufacturing province, has, in point of size, 41 establishments with individual gross production of over \$1,000,000, compared with 305 for Ontario, 177 for Quebec, 22 for Manitoba, 18 for Alberta, 13 for Nova Scotia, 12 for New Brunswick, and 9 for Saskatchewan. Capital investment, employees, and other factors show variation, in proportion to the size of establishment and according to the nature of the industry concerned (the 3 in Manitoba with production of over \$5,000,000 for instance, employ over five times as many persons as the 3 in the same class in Saskatchewan, and the 4 in the same class in British Columbia employ over thirteen times as many on the average as the 3 in Saskatchewan), but in a broad way the factor of size is reflected throughout the statistics.

Canada, by Provinces, Groups, and Individual Industries, 1937.
