Statistical Tables of Current Trade.—Tables 10 to 18 (pp. 534-575) deal with the current trade statistics of the Dominion. Tables 10 and 11 are summary tables, showing by groups Canada's trade with the United Kingdom, the United States, and all countries, by values and percentages, for the latest four fiscal years. Table 12 shows the same in detail for exports and Table 13 for imports of all important commodities. Table 14 shows, by main classes, imports as dutiable or free and exports as of Canadian or foreign produce for the five fiscal years 1935-39. Table 15 shows imports and exports for the fiscal year ended 1939 by degree of manufacture and by origin, and Table 16 gives similar information on a classification according to purpose.

In past years, Table 17 showed imports and exports for the two latest years by ports and provinces. The value of imports and exports at the several ports of entry were not a criterion of total imports for consumption at such ports nor all exports that originated there. The figures were therefore misleading unless these
