Canada is a country of continental dimensions, nearly 4,000 miles in length from east to west, with its relatively small population of 11,315,000 (estimated population as at June 1, 1939), in the main thinly distributed along the southern strip of its vast area. Different parts of the country are shut off from each other by areas of rough, rocky, forest terrain, such as the region lying between New Brunswick and Quebec, the areas north of Lakes Huron and Superior, dividing the industrial region of Ontario and Quebec from the agricultural areas of the prairies, and the barriers interposed by the mountains of British Columbia. To such a country with a population so distributed and producing mainly for export, as do western agriculturists or, like manufacturers, largely for consumption in distant
