

Table 18. Similar statistics of cargo carried by vessels in coastwise and inland international shipping are not available. The National Harbours Board now reports annually the water-borne cargo loaded and unloaded at the eight ports under its control. Six of these are among the principal ports of Canada and the cargo handled in each is shown in Table 27. The classification is the same as for railway freight (Table 21, pp. 654-655) and canal traffic (Table 22, p. 697). The figures include freight carried by coastwise and inland international, as well as by sea-going shipping. The total of sea-going cargo is shown for these same ports in Table 18, and the difference would be largely coastwise for these particular ports. The figures for each port include all cargo loaded or unloaded whether by facilities under the Board or at private docks and terminals in these ports. Cross-harbour movements and bunkering are excluded.

**27.—Principal Commodities in Water-Borne Cargo Landed from and Loaded to Vessels at Each of Six Principal Ports in Canada, 1939, compared with 1938.**

Port and Commodity.	Inward, 1939.	Outward, 1939.	Total, 1939.	Total, 1938.
