

Aggregate and Per Capita Wealth, by Provinces, 1929 and 1933.—For 1933 Ontario and Quebec led in absolute wealth, but Saskatchewan, Alberta, and British Columbia came first in per capita wealth. In 1929 the provinces held the same relative places, both as regards aggregate and per capita wealth.

39.—Provincial Distribution of the National Wealth of Canada, with Percentage and Per Capita Analyses, 1929 and 1933.

NOTE.—Figures for 1921 and 1925 are given at pp. 849-850 of the 1927-28 Year Book, and for 1927 at p. 870 of the 1931 Year Book.

Year and Province.	Estimated Wealth.	Percentage Distribution of Wealth.	Estimated Population, June 1.	Percentage Distribution of Population.	Per Capita Wealth.

¹ As the statistics for Yukon are uncertain, the per capita estimate of wealth is not shown.

² Includes the population of the Northwest Territories: 9,000 in 1929 and 10,000 in 1933, 0.09 p.c. in both cases.

Analyses of Itemized Wealth, by Provinces, 1929 and 1933.—Detailed statistics of the wealth of each province by leading items are given at pp. 882-883 of the 1936 Year Book.

Subsection 2.—National Income.

The subject of the national income is dealt with at pp. 889-896 of the 1938 Year Book, under the following headings: definition of national income, approaches to the measurement of national income, and income tax statistics as a measure of national income. The statistics shown under the last-named heading have been transferred to Subsection 3 of Sect. 1 of this Chapter, where they appear under the general heading of war tax revenue. The subject of national income as a whole and the revision of the method of estimation are still undergoing investigation by the Bureau, as outlined at p. 891 of the 1938 Year Book. Statistics for the years 1933-34, based upon the Survey of Production, are given at p. 866 of the 1937 Year Book. These are the latest figures published on the old basis.
