¹ Including taxes.

Section 3.—Sales of Canadian Bonds.

The total sales of Canadian bonds naturally reached a very high mark toward the close of the War of 1914-18, owing to the Dominion Government financing required to cover the war expenditures. However, the total sales were greater in 1936 than in any other year, owing largely to Dominion Government conversion loans.

Dominion Government financing through bond sales since 1907 may be divided into three periods: the first from 1908 to 1914, when the money was required largely for internal development of the country, public works, and Government railways; the second from 1915 to 1919, when war expenditures required very large borrowings; and the third since the War of 1914-18, when the issues have been required largely for refunding former loans at lower interest rates and for expenditures in connection with public works and railways. For index numbers of Dominion of Canada long-term bond yields, by months, for 1932 to May, 1940 see p. 825.
